#### **Virulent Newcastle Disease (VND) in Chickens, Downtown Los Angeles, Los Angeles County: UPDATE**

On 05/18/18 at 1105 hours, CSWC received a report from the California Department of Food and Agriculture (CDFA) that CDFA had detected virulent Newcastle disease (VND) in 10 chickens in Downtown Los Angeles, Los Angeles County.

- The detection has been confirmed by the United States Department of Agriculture's (USDA) Animal and Plant Health Inspection Service
- This is the first case of VND, previously referred to as exotic Newcastle disease, in the US since 2003.
- There is no commercial poultry production and no farms in the immediate vicinity.
- VND is not a food safety concern. No human cases have ever occurred from eating poultry products.
- Infection is easily prevented by using standard personal protective equipment.
- CDFA is working with federal and local partners as well as poultry owners to respond to the finding.
- State Officials quarantined potentially exposed birds and have tested for the disease.
- Cal OES is monitoring and remains on standby to assist as warranted.

Per CDFA on 05/21/18 at 1640 hours:

- CDFA is making good use of their outreach and poultry health connections to the urban poultry community.
- CDFA does not have a regional quarantine in place because they have yet to find an actively infected premises.
- CDFA is conducting area surveillance around the quarantined home location of the infected flock and other areas of concern.
- CDFA is actively looking for disease and will continue to provide regular updates.

Per CDFA on 05/23/18 at 1113 hours, an owner called yesterday ("sick-call") as a result of CDFA's outreach. CDFA visited the premises late yesterday, sampled and quarantined. Very preliminary tests from California Animal Health & Food Safety (CAHFS) look positive for VND.

- Near this potential new premises, CDFA suspects there is a large premises with multiple bird owners and rumors of significant death loss.
- CDFA will be investigating and quarantining that facility today.

| Normal Operations       | Normal Operations | Normal Operations  | Normal Operations   |

### Cal OES SOUTHERN REGION

#### **Virulent Newcastle Disease (VND) in Chickens, Downtown Los Angeles, Los Angeles County: UPDATE (Continued)**

Per CDFA on 05/23/18 at 1506 hours: CDFA needs assistance with Newcastle Disease outbreak - Ontario or vicinity.

- CDFA is finding more disease and scaling up their response.
- The new presumptive positive premises is in San Bernardino County.
- The problem is space for CDFA's Incident Command Post (ICP) and supplies.
- The current ICP in Ontario at the Animal Health Branch District Office is too small for the current 50 responders and for CDFA to maintain biosecurity.
- If this goes on for some time, they will look for a leased facility, but right now they need to find temporary space at a fair ground, city or county emergency operation center, or other county location.
- The space will be needed for a month assuming they can lease that quickly if this outbreak is protracted.
- Storage is also needed (ideally at a different location or building), workstation space with internet access and meeting rooms.
- The point of contact at the CDFA Department Operation Center is Kimberly McCarthy.
- CDFA Animal Health and Food Safety Services (AHFSS) is reaching out to the fairs in or by San Bernardino County.

Per the Cal OES Southern Region Duty Officer (SDO) on 05/23/18 at 1539 hours:

- SDO is working with the Cal OES Sr. ESC (assigned to San Bernardino County and covering Los Angeles County) to reach out to San Bernardino Emergency Manager for locations to fit CDFA needs.
  - Sr. ESC suggested the Pomona County Fair Grounds, located between Los Angeles and San Bernardino
  - SDO suggested National Orange Show Sports Center in San Bernardino.
- SDO is reaching out to CDFA AHFSS for specific information.
  - CDFA AHFSS suggested that the ICP, storage site and meeting room were on the same site
  - CDFA AHFSS provided two addresses both in the Muscoy area of the County and about 2.5 miles apart.:
    - 3187 N. Gardena St. San Bernardino
    - 2505 Kern St. San Bernardino.

## **Active Weather Warnings, Watches and Advisories by County:**

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

# Key Points

05/24 – 05/30

## Thursday

- Showers and thunderstorms at times, mainly northern mountains, locally heavy rain possible

## Friday-Sunday

- Showers and thunderstorms at times, mainly mountains, with gusty winds and heavy rain possible
- Snow in the Sierra Nevada above 8000 feet
- Rivers running cold and fast
- Periods of rain and snow will cause travel difficulties and impact the increased number of people recreating outdoors due to the holiday weekend

## Monday-Wednesday

- Dry with near to above normal temperatures
- No significant impacts expected

# Days 1-3 Precipitation Forecast

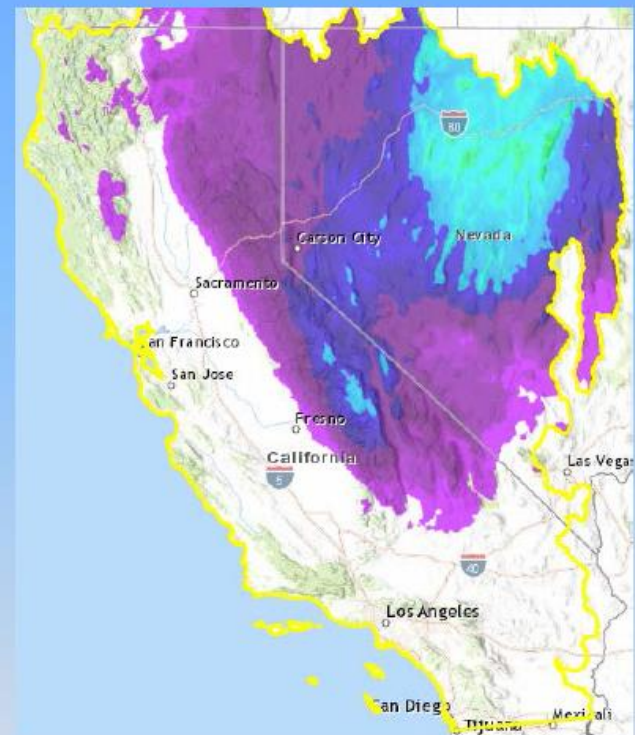

Precipitation (inches)

Thursday

Friday

Saturday

Light precipitation except up to .50 inch possible northern mountains. No precipitation in SoCal.

# WEATHER SYNOPSIS BY REGION

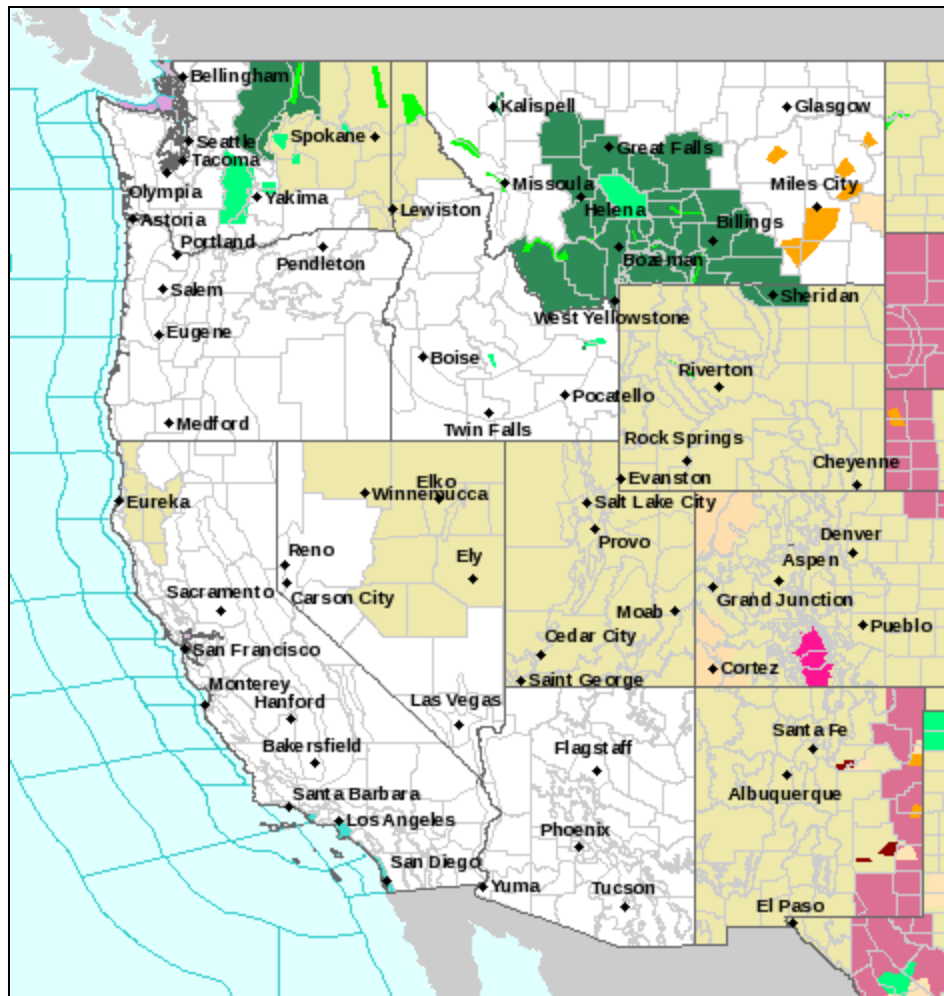

## **NORTHERN CALIFORNIA**

Another Pacific low pressure system approaching the coast will allow the wet unsettled weather pattern to continue in the region. The main focus for widespread showers and scattered thunderstorms will be the mountains, but nearby valleys will also see some isolated activity. This pattern will continue through Friday. S-W winds will gust to 20-30 mph each afternoon, and outflow gusts from thunderstorms could reach 35 mph. Temperatures will be near to below normal through Friday. Drier and warmer weather is expected over the Memorial Day weekend into the middle of next week as the low exits the region and high pressure passes overhead. There may still be isolated showers and thunderstorms over the Sierra Saturday and Sunday, however. NW-NE downslope winds will enhance the warm and dry conditions from the western Sierra slopes to the coastal mountains.

## **SOUTHERN CALIFORNIA**

Weak high pressure will build across the region today, leading to slightly warmer temperatures and an earlier dissipation of the marine layer. Highs, while still well below normal, should climb 3-5 degrees away from the coast. Another low pressure area approaching the West Coast will generate south winds of 15-30 mph late this afternoon across the Owens Valley and nearby areas of the Inyo National Forest and Death Valley National Park. Typical sea breezes to 25 mph will occur today and Thursday across the Antelope Valley and Banning Pass. Isolated thunderstorms will be possible near the Sierra Crest the next two days, but coverage should be much less than earlier this week. The low pressure area will move through the central part of the state Friday which will lead to an increase in showers and isolated thunderstorms in the Sierras and higher elevations of the desert during the afternoon hours Friday and Saturday. Temperatures will fall a few degrees and marine layer coverage may be deep enough to generate drizzle near the higher terrain Friday and Saturday all the way to the coastal slopes. The low will depart Saturday night, resulting in north winds of 15-25 mph across Santa Barbara County and the I-5 Corridor. Another weak ridge will finally allow temperatures to climb to near normal readings next Monday and Tuesday with highs close to 90 in the San Joaquin Valley and up to 103 in the low desert. Long range models indicate cooler weather may return for the second half of next week. No offshore winds or periods of hot weather are expected the next 10 days.

# Cal OES LAW ENFORCEMENT MISSIONS

## Ongoing Cal OES Law Missions

- **2018-LAW-46811, 05/19/18, 1217 hours:** Mendocino County Sheriff's Office advised that on Friday 05/18/18 at 1300 hours, a 76 year old female at risk with early stage Alzheimer's walked away from her residence in the town of Piercy. Mendocino Sheriff requested twenty (20) Type I and Type II searchers, two (2) trailing K-9's and two (2) area K-9's for 0900 hours start time on Sunday 05/20/18, at the Piercy Community Center off of Hwy. 271 in Piercy. **Update 05/20/18:** Mendocino County Sheriff requested the following resources for Monday 05/21/18 - 50 Type I and II searchers; four wheel drive trucks or vans with a driver to transport search teams; California National Guard (CNG) support for 50 Nano shout devices with technician support; 5 area search dogs. Cal OES LEB is coordinating the request. **Update:** Mendocino County Sheriff requested the following resources for Tuesday 05/22/18 and Wednesday 05/23/18 for 50 Type I and II searchers; four wheel drive trucks or vans with a driver to transport search teams; 5 area 2 trailing search dogs. Cal OES LEB is coordinating the request. **Update:** Mendocino County Sheriff requested the following resources for Wednesday 05/23/18 and Thursday 05/24/18: 50 Type I and II searchers; four wheel drive trucks or vans with a driver to transport search teams; 2 overhead personnel; 1 area, 2 trailing and 2 HRD search dogs. Cal OES LEB is coordinating the request. **Mission Ongoing.**

## Emergency Management Assistance Compact

- **2018-Cal OES-46751:** The State of Hawaii requested one (1) Geothermal Subject Matter Expert (SME) from the California Department of Conservation, Division of Oil Gas & Geothermal Resources, to provide support to the volcanic activity occurring in Hawaii. The SME has industry and regulatory experience, as well as knowledge of geothermal wellhead construction, operations, processes, risk management, and mitigation. Original deployment dates: 5/13/18 - 5/19/18. The State of Hawaii has requested an extension of this resource; the new return date is 05/24/18.

# Cal OES MISSION TASKING

## Cal OES Missions

- **2018-IREOC-45244:** Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene – Long-term assignment)
- **2017-SOC-44098:** CalRecycle Debris Management Team in Ventura County (Coordinating)
- **2017-SOC-43821:** DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)
